

hCG 5000iu Easy Pen

**TRIGGER OVULATION, SUSTAIN
PREGNANCY AND PRESERVE
TESTOSTERONE PRODUCTION**

Easy Pen

hCG is a natural glycoprotein hormone that mimics luteinizing hormone (LH), playing a key role in fertility and hormonal health. In women, it's used to trigger ovulation and support progesterone during IVF and IUI cycles. In men, hCG helps maintain testosterone production, testicular function, and fertility, especially during or after TRT.

Its ability to replicate the LH surge makes it a trusted option in reproductive medicine. With decades of clinical use and FDA approval for fertility treatments, hCG is valued for both its safety and dual effectiveness.

Key Potential Benefits

- **Ovulation Trigger & Pregnancy Support** – Clinically used to induce final oocyte maturation in IVF/IUI protocols, improving pregnancy success rates.
- **Luteal Phase Support in Women** – Helps sustain corpus luteum function and progesterone production post-ovulation.
- **Maintains Testosterone & Fertility in Men** – Drives natural testosterone production and protects testicular function during testosterone therapy.
- **Safe & Well-Studied Use** – Long record of safe use in reproductive medicine with routine monitoring and minimal side effects.
- **Flexible Administration** – Suitable for timed fertility treatments or as part of male hormone protocols, personalized by dosing.

Technical Information :

CAS Number: 9002-61-3

PubChem CID: Not available and might not be a discrete structure.

Formula: C50H68N14O10

Specifications:

- 0.05mg per click.
- Up to 60 clicks per dose.
- Includes 4 needles and one adjustable dosage pre-mixed pen.
