gen

NAD+ is a vital coenzyme found in all cells, supporting energy production, DNA repair, detoxification, and healthy aging. While IV NAD+ delivers fast, high-dose rejuvenation, subcutaneous injections offer a gentler, sustained release ideal for ongoing cellular support. This method provides steady absorption, reducing side effects linked to IV peaks.

Research suggests restoring NAD+ levels may boost energy, mental clarity, recovery, and resilience to aging and stress—making it a powerful tool for long-term wellness and cellular optimization.

Key Potential Benefits

- **Sustained Energy & Vitality** – Restores NAD+ for improved mitochondrial ATP production and overall daily stamina.
- **Cognitive Clarity & Focus** – Supports neuronal repair and reduces oxidative brain stress, improving concentration and mental sharpness.
- **Cellular Repair & Anti-Aging** – Promotes DNA repair and longevity pathways through sirtuin activation and reduced oxidative damage.
- **Metabolic Support** – Enhances metabolism, insulin sensitivity, and healthy fat utilization—supportive of weight management.
- **Mood & Stress Resilience** – Helps stabilize mood, regulate neurotransmitters, and improve stress response.

Technical Information:

CAS Number: 53-84-9

PubChem CID: [5893](#)

Formula: C₂₁H₂₈N₇O₁₄P₂+

Specifications:

- 3.33mg per click.
- Up to 60 clicks per dose.
- Includes 4 needles and one adjustable dosage pre-mixed pen.
