

Retatrutide 10mg Easy Pen

MAXIMIZE WEIGHT LOSS, GLYCEMIC CONTROL, AND METABOLIC HEALTH

Easy Pen

Retatrutide is a next-generation peptide that targets three key metabolic receptors—GLP-1, GIP, and glucagon—for powerful weight loss and metabolic benefits. This triple-action therapy curbs appetite, boosts energy expenditure, reduces liver and visceral fat, and improves blood sugar control.

Clinical trials show record-breaking fat loss results without surgery. By activating multiple hormone pathways, Retatrutide helps rebalance energy, improve insulin sensitivity, and support long-term cardiometabolic health in a uniquely effective way.

Key Potential Benefits

- **Dramatic Weight Reduction** – Participants in a 48-week Phase 2 study lost up to 24.2% of initial body weight at higher doses.
- **Enhanced Glycemic Control** – Significant reductions in HbA1c and fasting glucose were observed in adults with obesity ± type 2 diabetes, outperforming monotherapies.
- **Liver Fat & Liver Health Support** – Over 80% of participants achieved ≥70% reduction in liver fat; >85% resolved steatosis in a MASLD subgroup.
- **Improved Cardiometabolic Markers** – Notable drops in blood pressure, triglycerides (-40%+), LDL, and inflammatory biomarkers.
- **Favorable Body Composition** – Retains lean mass while reducing fat mass, based on recent body-composition data.
- **Convenient Weekly Dosing** – Long half-life (~6 days) allows comfortable once-weekly subcutaneous injections.

Technical Information:

CAS Number: 2381089-83-2

PubChem CID: [171390338](#)

Formula: C221H342N46O68

Specifications:

- 0.05mg per click.
- Up to 60 clicks per dose.
- Includes 4 needles and one adjustable dosage pre-mixed pen.
