

SS-31 50mg Easy Pen

**RESTORE CELLULAR POWER, REDUCE
OXIDATIVE DAMAGE AND
SUPPORT ORGAN HEALTH**

Easy Pen

SS-31, or Elamipretide, is a mitochondria-targeting peptide that binds to cardiolipin to stabilize mitochondrial structure and restore energy production. Research shows it reduces oxidative stress, improves ATP generation, and repairs damaged mitochondrial membranes.

SS-31 supports heart, brain, muscle, and kidney function by enhancing mitochondrial efficiency and resilience. It shows promise in age-related decline, mitochondrial disorders, and endurance by protecting cells at their energy core and reversing structural dysfunction.

Key Potential Benefits

- **Enhanced Cellular Energy** – Improves mitochondrial function and ATP production, helping cells reclaim vitality.
- **Increased Physical Endurance** – Boosts exercise tolerance in aged and chronically fatigued systems.
- **Neuroprotection & Cognitive Resilience** – Shields brain cells from oxidative stress and supports memory and learning.
- **Cardiovascular Support** – Promotes heart muscle health, reduces ROS, and helps treat cardiomyopathies.
- **Kidney Function & Metabolic Health** – Preserves mitochondrial structure in kidneys and organs; supports metabolic resilience.

Technical Information:

CAS Number: 49557-75-7

PubChem CID: [11764719](#)

Formula: C₁₆H₂₆CuN₆O₆

Specifications:

- 0.25mg per click.
- Up to 60 clicks per dose.
- Includes 4 needles and one adjustable dosage pre-mixed pen.
