

GHK-Cu 50mg Easy Pen

ACCELERATE HEALING, REJUVENATE SKIN, AND SUPPORT CELLULAR HEALTH

Easy Pen

GHK-Cu is a natural copper peptide found in plasma and tissues, known for its powerful role in regeneration, skin repair, and anti-inflammatory signaling. Levels decline with age, impacting healing and skin health.

GHK-Cu delivers bioavailable copper, boosts collagen and elastin production, reduces inflammation, and activates genes linked to stem cell function and tissue renewal. It also supports angiogenesis for better healing. Widely studied for recovery, aesthetics, and longevity, GHK-Cu is valued for its ability to restore youthful cellular activity.

Key Potential Benefits

- **Accelerated Wound Healing** – Stimulates collagen production, fibroblast activity, and blood vessel formation to repair damaged tissue faster.
- **Skin Rejuvenation & Anti-Aging** – Improves skin elasticity, density, and tone while reducing fine lines, wrinkles, and sun damage.
- **Reduces Inflammation** – Suppresses pro-inflammatory cytokines (like TNF- α and IL-6), helping to calm chronic inflammation and redness.
- **Antioxidant Protection** – Boosts the body's natural antioxidant enzymes, such as superoxide dismutase (SOD), to protect against oxidative stress.
- **Supports Hair Growth** – Encourages follicle health and angiogenesis in the scalp, which may promote stronger, thicker hair.
- **Gene Expression Modulation** – Regulates thousands of genes associated with healing, regeneration, stem cell activation, and anti-aging.
- **Scar Reduction & Tissue Remodeling** – Promotes proper wound remodeling and reduces excessive scarring or fibrosis.

Technical Information :

CAS Number: 49557-75-7

PubChem CID: [154723978](#)

Formula: C₁₆H₂₆CuN₆O₆

Specifications:

- 0.25mg per click.
- Up to 60 clicks per dose.
- Includes 4 needles and one adjustable dosage pre-mixed pen.
